IMAGETRANSFORM

The leader in Green Billboards.

When looking for **environmentally friendly billboard solutions**, look no further than **Image Transform!**

Image Transform has been an innovator in billboard printing for 30 years. We were one of the first to make the jump to high resolution digital printing back in the 80's, we have been printing with non-soluble inks for over 7 years and we are now at the forefront of printing **100% recyclable** polyethylene substrate with the latest in eco-friendly inks.

Our Green Billboards are printed on a variety of substrates - depending on your specific needs. They last longer than conventional billboards, lasting up to 6 months.

Posterflex - 100% Recyclable

Made from 100% recycled polyethylene, **Posterflex** is the only seamless, light - weight recyclable, uncoated paper replacement product in the outdoor advertising industry. It completely eliminates glue, re-posts, monthly installs, blisters, flags and bleed through.

flexLite - 100% Recyclable

Also made from 100% recycled polyethylene, **flexLite** is a direct replacement for vinyl billboards and banners. **flexLite** is **1/3 the weight** of vinyl, heat weldable and completely recyclable.

Eco-Friendly Inks

Brilliant colors from solvent inks are the standard at **Image Transform**. We use corn-based, bio-renewable solvent inks to produce stunning and durable billboards.

Our new production facility in Grimes, Iowa provides us with expanded capabilities to serve our clients.

100% Recyclable!

We print on **100% recyclable substrate** with **environmentally friendly non-toxic inks**.
